# AMS
AIRFIELD MANAGEMENT SYSTEM

Airfield Management System (AMS©) software has been developed to record winter runway conditions. Directly connected to SNOWiz from NAV CANADA, AMS© will instantly publish **SNOWTAM** (NOTAMJ) from collected data.

FEATURES

- User-friendly interface
- NAV CANADA SNOWIZ compliant
- Weatherproof tablet
- Multi-user functionality
- Interactive runway mapping
- Secured connection
- Customizable

BRIEF TRAINING

- Being completely integrated with the SNOWiz system, the AMS© training is brief as all codes, abbreviations, and terminology remain the same.

SIMPLIFIED DATA ENTRY

- The administration interface contains a list of common and/or site-specific contaminants that will allow for quick identification and data entry.
- Automatic comment entry for those most often utilised ensuring quick data input.
